

PRESS RELEASE 2013-01-23: SignCut - now compatible with Windows 8 and Mountain Lion

We are pleased to confirm that the latest version of SignCut has been fully tested on both Windows 8 and the latest versions of Mac, OSX Mountain Lion up to 10.8.2. Signcut is fully compatible on both Operating Systems.

We can also confirm that our plugins for the most popular design packages, CorelDRAW X6, Adobe Illustrator CS6 and Inkscape version .48 also work on Windows 8 and are automatically installed with the latest version of SignCut. On the Mac platform we provide plugins for both Inkscape and Illustrator CS6 as a separate download.

If you have recently upgraded your operating system or design software why not give our latest version, 1.95 a try. Interested in what is coming soon? Feel free to give the Latest Beta version a spin, also available for download from our site. Should you need a little help getting started or have feedback, our support team is ready to help.

To contact support or find downloads of our most recent work please visit our website [here](#).
